

GOKUL KANAGARAJ

Cyber Security Engineer

+91 7092582184

gokulkanagaraj7@email.com | linkedin.com/in/gokulkanagaraj

Dharmapuri, Tamil Nadu

PROFESSIONAL SUMMARY

Detail-oriented Cybersecurity graduate with strong knowledge of network security, incident response, threat analysis, and risk assessment. Skilled in leveraging SIEM and SOAR tools to analyze logs, detect anomalies, and mitigate cyber threats. Experienced in ethical hacking, vulnerability assessment, and penetration testing, applying industry-standard methodologies to strengthen security posture. Familiar with ISO/IEC 27001 and NIST Cybersecurity Framework, with a commitment to continuous learning, compliance, governance, and contributing to secure digital environments.

EDUCATION

Bachelor of Engineering in Cyber Security

Paavai Engineering College (Autonomous)

Namakkal, Tamil Nadu

Pursuing | Current CGPA: 8.33/10

SSLC & HSC (2019 - 2022)

Variyar Higher Secondary School

Dharmapuri, Tamil Nadu

Completed with 75%

EXPERIENCE

Cyber Security Virtual internship

Oct 2025 – Nov 2025

Forage

- Applied SIEM/SOAR frameworks to analyze security logs and respond to simulated cyberattacks, building hands-on expertise in threat detection, incident response, and security automation.
- Executed real-world cybersecurity simulations including risk assessment and incident response workflows, enhancing proficiency in SOC operations and aligning skills with industry-standard roles.

Cyber Security & Ethical Hacking Intern

Mar 2024 – Apr 2024

TechnoHacks EduTech Official

- Executed penetration testing and vulnerability assessments across diverse systems, identifying critical flaws and recommending remediation strategies. Enhanced the overall network defense posture by minimizing false positives, streamlining threat detection, and enhancing incident response efficiency.
- Collaborated with senior security analysts to refine incident response playbooks, improving detection-to-resolution timelines and strengthening SOC efficiency. Gained experience with ISO/IEC 27001, NIST Cybersecurity Framework, and ethical hacking methodologies to support compliance, governance, and risk management initiatives.

SKILLS

Java

Linux

Networking

Web Security

Incident Response

Bash & Shell

Scripting

SIEM

ISO 27001

Report Writing

Ethical Hacking

Vulnerability Management

Log and Threat
Monitoring

CERTIFICATIONS

- Let's Defends SOC Analyst Career Path
- Security Blue Team Junior Analyst Path
- Europe Academy Certified Ethical Hacker
- CISCO Junior Cybersecurity Analyst Path
- Qualys Vulnerability Management Detection and Response
- Udemy-The Complete Hands-on Cybersecurity Analyst Course

PROJECT

Real-Time Threat Monitoring & Response Using Wazuh and Shuffle

- Integrated Wazuh and Shuffle to enhance cybersecurity operations by developing real-time threat detection and automated incident response workflows.
- Facilitated rapid, coordinated defense against cyber threats, reducing manual intervention and improving overall security efficiency.
